In general, each of these tasks will have unique presentation and interaction requirements.

Some will be assisted by the program, some will require the teacher's direct involvement.

The table below illustrates the specific Tasks taught in each of the 100 Lessons.

Hopefully, it makes it easier to see repetition patterns and when concepts are introduced.

Arranging all lessons to fit into the fifteen minute format is interesting.

This acknowledges short attention spans by interspersing different tasks.
